

6 KEY BENEFITS OF Cloud Hosting

Scalability & Flexibility

It is highly beneficial to businesses of all kinds and sizes as you can add or reduce various resources like storage and bandwidth

Cost Efficiency

The cloud is offered as a ***software as a service (SaaS)***. You only pay for what resources your organisation is using, allowing you to save on costs

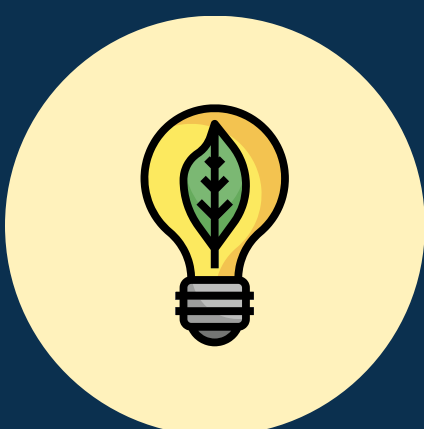

Traffic & Uptime

With many dedicated servers, you will automatically reduce your downtime. Because of this, you will see higher productivity levels with less downtime

Downtime & Recovery

Because of the use of multi servers, you will be set up for automatic backups of your data. It will also be an easy process to recover data if it gets lost

Ease of Mind

Working with a vendor such as ourselves, you will benefit from receiving ongoing support and training, allowing you to get the best out of your systems

Collaboration

No matter if they're in the office or working remotely somewhere, employees will be able to access any applications and data from anywhere with a connection
