Scammers can hack a simple 8-character password

IN UNDER AN HOUR.

Common passwords like

"123456" or "password"

are cracked instantly.

THE RESULT?

Stolen data, lost money, and broken trust.

To strengthen passwords:

Use at least 12 characters with a mix of letters, numbers, and symbols.

1

2

Avoid personal information, like names, birthdays, or pet names.

Never use the same password across multiple accounts.

3

4

Use a password manager to create and store secure logins.

Turn on multi-factor authentication (MFA) for added protection.
